

Water Efficiency Survey Program Commercial Properties

About the Program

Metropolitan offers free in-person water use surveys for large commercial landscapes to provide property owners with recommendations for reducing water waste. Surveys are scheduled on a first-come, first-served basis. Apply as soon as possible since funding is limited.

Eligibility

Eligible landscapes include industrial and commercial sites, homeowner association common areas, and institutional places like schools, parks, and government facilities. A property must have at least one acre of irrigated landscape to receive a survey and fall within the Metropolitan's service area. These requirements will be verified by a pre-inspection of the property.

What to Expect

The certified landscape auditor will conduct a comprehensive review of the irrigation system including:

- System pressure
- Controllers
- Site conditions and irrigation scheduling
- Issues that cause higher water use, such as valve malfunctions, high or low pressure, sprinkler misalignment, poor draining, breaks and leaks, and runoff

About Metropolitan

The Metropolitan Water District of Southern California is a state-established cooperative of 26 member agencies – cities and public water agencies – that serve 19 million people in six counties. Metropolitan imports water from the Colorado River and Northern California to supplement local supplies and helps its members develop increased water conservation, recycling, storage and other resource management programs.
