For Immediate Release, September 7, 2021:

Crescenta Valley Water District is pleased to announce that the District has received a grant from the Bureau of Reclamation. The Bureau selected 82 applicants across the 16 western states for WaterSMART small-scale efficiency projects to help local communities make water efficiency improvements. The District applied for a grant to cover the cost of large meter replacement. The District will expand its advanced metering infrastructure program by replacing nineteen 3-inch meters and two 4-inch meters for apartment and condominium complexes and park irrigation. The project will result in improved water reliability, better water data and increased public awareness of water use. The grant will fund \$75,000.00 of the \$200,00.00 project. The project supports several long-term planning goals including the District's 2015 and 2021 Urban Water Management Plan.
