Subject: **Notice of Construction** – Installation of A New Emergency Electrical Generator at the La Granada Wastewater Lift Station, Project No. S-962

Dear Resident:

Crescenta Valley Water District (CVWD) places the greatest importance on the safety and well-being of residents and businesses served by CVWD's sewer collection system in the City of La Cañada Flintridge. To maintain sewer service during a power outage, CVWD has awarded a construction contract to Affordable Generator Services, Inc. of Santa Fe Springs to install an emergency electrical generator at the Wastewater Lift Station between La Granada Way and Parkdale Place (see project location map on reverse side).

Construction is anticipated to begin on Monday, August 1, 2022. The contractor (Affordable Generator Services) will begin by installing a **temporary fence around the wastewater lift station on Friday, July 29, 2022.** The anticipated completion date is December 2022. Please visit CVWD's website at <https://www.cvwd.com/project-notifications> for updates on the construction schedule and additional information.

We would like to remind you that the contractor will install temporary parking and traffic restrictions along La Granada Way and Parkdale Place. This will allow the contractor's crews to work safely and expeditiously to complete the project. Temporary "No Parking" signs will be posted a minimum of two (2) days before construction. We request that you observe these signs and any other traffic control. Driveways within the construction zone may be temporarily restricted due to the construction. CVWD's on-site inspector and the contractor will assist you with access into and out of your driveway.

As in most construction projects, the work will create a certain amount of unavoidable public inconvenience. Your cooperation in making this project successful will be greatly appreciated.

If you have any questions or comments concerning this project, please contact Jennifer Bautista at (818) 236-4116 or email at jbautista@cvwd.com.
