Subject: **Notice of Water Shutdown** – Tie-in of a New 8-inch Fire Service for Clark Magnet High School (Clark) on the 3400 Block of Santa Carlotta Street.

Dear Customer:

Please be advised that on the morning of **Tuesday, June 7, 2022**, Crescenta Valley Water District will be performing a water main shutdown to tie a new 8-inch water main valve into the existing 8-inch water main on the 3400 block of Santa Carlotta St. (see map on reverse side). This new main is being installed to provide additional fire service at Clark and allow for the construction of a new robotics building.

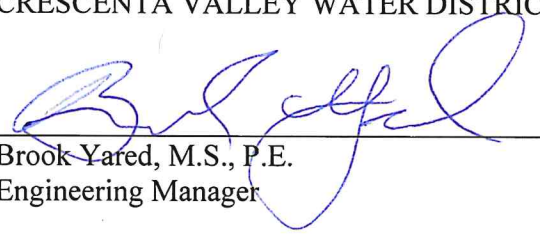

This work will result in a temporary interruption of water service at your address on **Tuesday, June 7, 2022**, between the hours of 8:00 a.m. and 4:00 p.m. Please plan for a temporary loss of water and accept our apology if this causes you any inconvenience. A door hanger notification will be delivered to all residents affected should the date and/or time of the work change.

We suggest that you draw water in advance of the shut-off time to supply ordinary needs. It is also advisable to store water in the bathtub for toilet flushing. After the water is put back in service, we recommend that you turn on your water faucets slowly as there may be air trapped in your water line from recharging the water main in the street. The air should dissipate quickly, and water service will be restored back to normal. It is also suggested that you consult the User's Manual for any appliances connected to your home's plumbing system (i.e., water softeners, water heaters, etc.) to ensure proper use after the water is back in service.

This work is all part of the District's continuing effort to improve your water system. We ask for your cooperation and thank you for helping us make this project a success.

If you have any questions or comments concerning this project, please contact Customer Service at (818) 248-3925 or via e-mail at customerservice@cvwd.com.
