

CRESCENTA VALLEY WATER DISTRICT

FY 21/22 Water Pipeline Replacement Project E-1034

As part of our ongoing efforts to enhance service reliability to our customers, Crescenta Valley Water District (CVWD) will be replacing approximately 1,750 feet of water pipeline as part of CVWD's FY 21/22 Capital Improvement Program.

The project will replace old 6-inch water pipelines on the 4700-4800 blocks of Cheryl Ave. and the 3200 blocks of Alabama Street, with new 8-inch diameter steel pipelines. These water pipelines were originally installed in the 1940s and 1950s. Since then, the pipelines have developed numerous leaks necessitating their replacements.

In the interest of public safety and since the pipelines have deteriorated beyond their useful life, the District will be replacing the pipelines as part of CVWD's ongoing pipeline replacement program.

For the exact location, see the project location map on page 2 of this notice.

CONSTRUCTION PHASE SCHEDULE (As of August 10, 2022)

May 11, 2022 – Project placed on hold due to supply chain issues

August 22, 2022 - Anticipated start of construction

November 22, 2022 - Anticipated end of construction

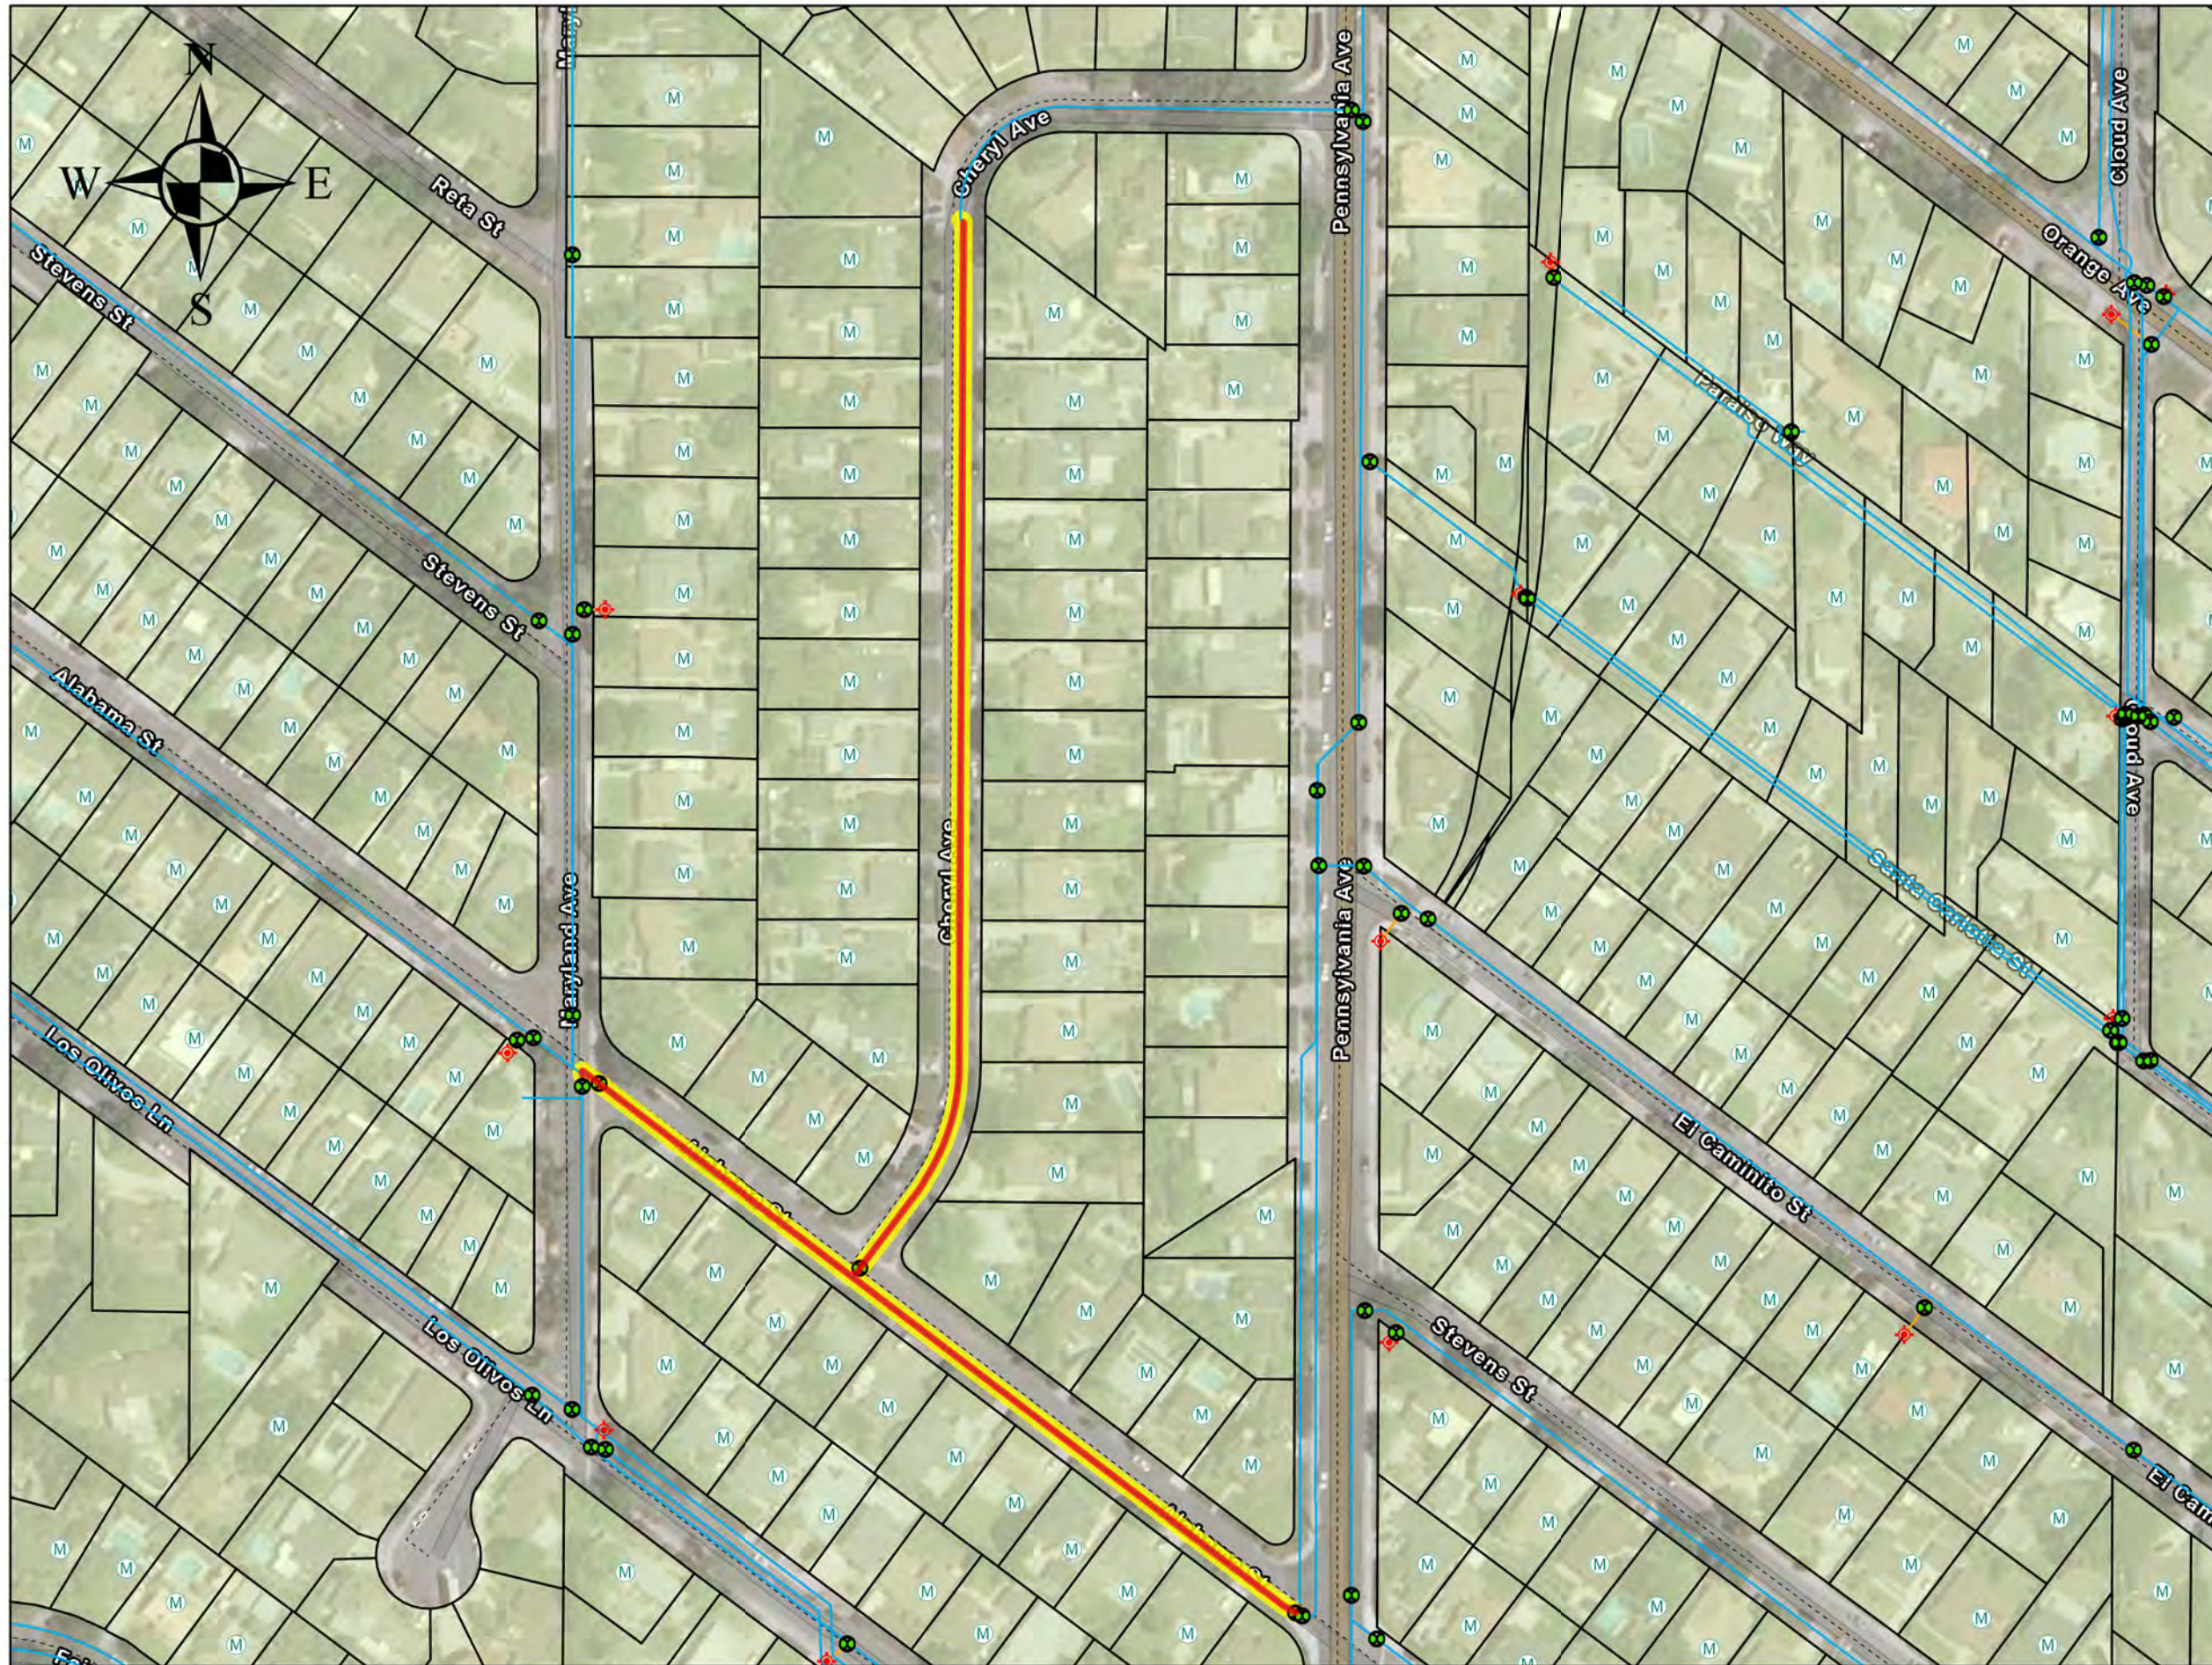

Residents will have access to their properties at all times except for a short period while the contractor installs the pipeline directly in front of each driveway. Access for emergency vehicles, mail delivery, and trash services will be maintained at all times. CVWD advises that residents avoid traveling through the construction zone whenever possible. CVWD will provide an updated construction schedule via CVWD's website (www.cvwd.com/current-construction) and on Facebook (www.facebook.com/CrescentaValleyWaterDistrict) to better inform the community of the construction activities as the project progresses.

As in most construction projects, this work will create a certain amount of unavoidable public inconvenience such as:

- There will be a period of time, usually between 6 to 8 hours, when the water service to your home will be shut down. This will occur when the contractor ties the new water pipeline into the existing water distribution system. The district will send another letter regarding the contractor's construction schedule and the anticipated shutdown date. In addition, CVWD will notify each resident, a minimum of 48 hours before the actual shutdown, with a door hanger that indicates the date and time of the shutdown.
- The contractor will be installing temporary parking and traffic restrictions along Alabama Street, Cheryl Ave, Maryland Avenue and Pennsylvania Avenue. This will allow the contractor's crew to work in a safe and expeditious manner to complete the project. Temporary "No Parking" signs will be posted a minimum of 30 hours before construction. The district asks that you observe these signs and any other traffic control. Driveways within the construction zone may be temporarily restricted due to the construction. CVWD's on-site inspector and the contractor will assist you with access into and out of your driveway.

We understand the inconvenience these types of projects can cause and appreciate your patience and cooperation in helping us make this project successful. Additional information will be updated periodically on CVWD's website at www.cvwd.com/current-construction.

If you have any questions or comments concerning this project, please contact: Christina Kopelman, Project Manager - Phone (818) 236-4115 or email - ckopelman@cvwd.com
