Crescenta Valley Water District

Water - Use it Wisely

Crescenta Valley Water District invites you to join us on the evening of Thursday October 26, 2023, at 6pm for an in-person Community Meeting. This meeting will provide you with the opportunity to meet our staff working on the upcoming Rehabilitation of Goss Canyon No.2 Reservoir, discuss the limits of the project, review the construction activity, and answer any questions you may have. We look forward to meeting with you. See project location map on reverse side.

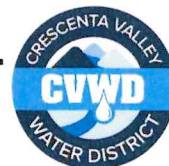

Highlights

- Meet our staff and Contractor working on the project
- Understand why CVWD is rehabilitating the reservoir
- Find out the project schedule
- Ask any questions you may have

October 12, 2023

Subject: **Notice of Construction** – Rehabilitation of Goss Canyon No.2 Steel Reservoir,
Project E-1066.

Dear Resident:

Crescenta Valley Water District (CVWD) would like to inform you of an upcoming improvement project in your neighborhood. CVWD awarded a contract to J. Colon Coatings of Alta Loma, CA, in July 2023. This project will involve the rehabilitation of the roof and interior surfaces of the existing water storage tank located at the top of Goss Canyon Avenue. The water storage tank is an important component of the District's water supply in your area and is part of the District's continuing efforts to provide its residents with a safe and reliable potable water supply.

The contractor will begin mobilizing on Monday, November 6, 2023. The project is expected to be completed by March 2024. The construction hours will be from 7:30am to 4:00pm on weekdays. The rehabilitation process will involve sandblasting, welding, painting and roof improvements. Kindly be aware that, note during this period, construction will generate intermittent noise. We apologize in advance for the unavoidable noise as the contractor works on rehabilitating the reservoir.

Contractor vehicles will be parked on CVWD property at the reservoir site. The existing gate on Goss Canyon Avenue will be used as the main entry point. Please notify us if there are any problems with the increased traffic on Goss Canyon Avenue.

In addition, to help the contractor stay on schedule and ensure a high-quality finished product on the interior surfaces, dehumidification equipment will be placed on site. This equipment may run twenty-four (24) hours throughout the week and is typically turned off on weekends. This is a necessary measure to adhere to coating requirements and prevent issues such as rust blooms, blistering and curing failures on the interior surfaces.

As in most construction projects, the work will create a certain amount of unavoidable public inconvenience. Your cooperation in making this project successful will be greatly appreciated. Additional information, that is updated periodically, can be found at Crescenta Valley Water District's website at www.cvwd.com.

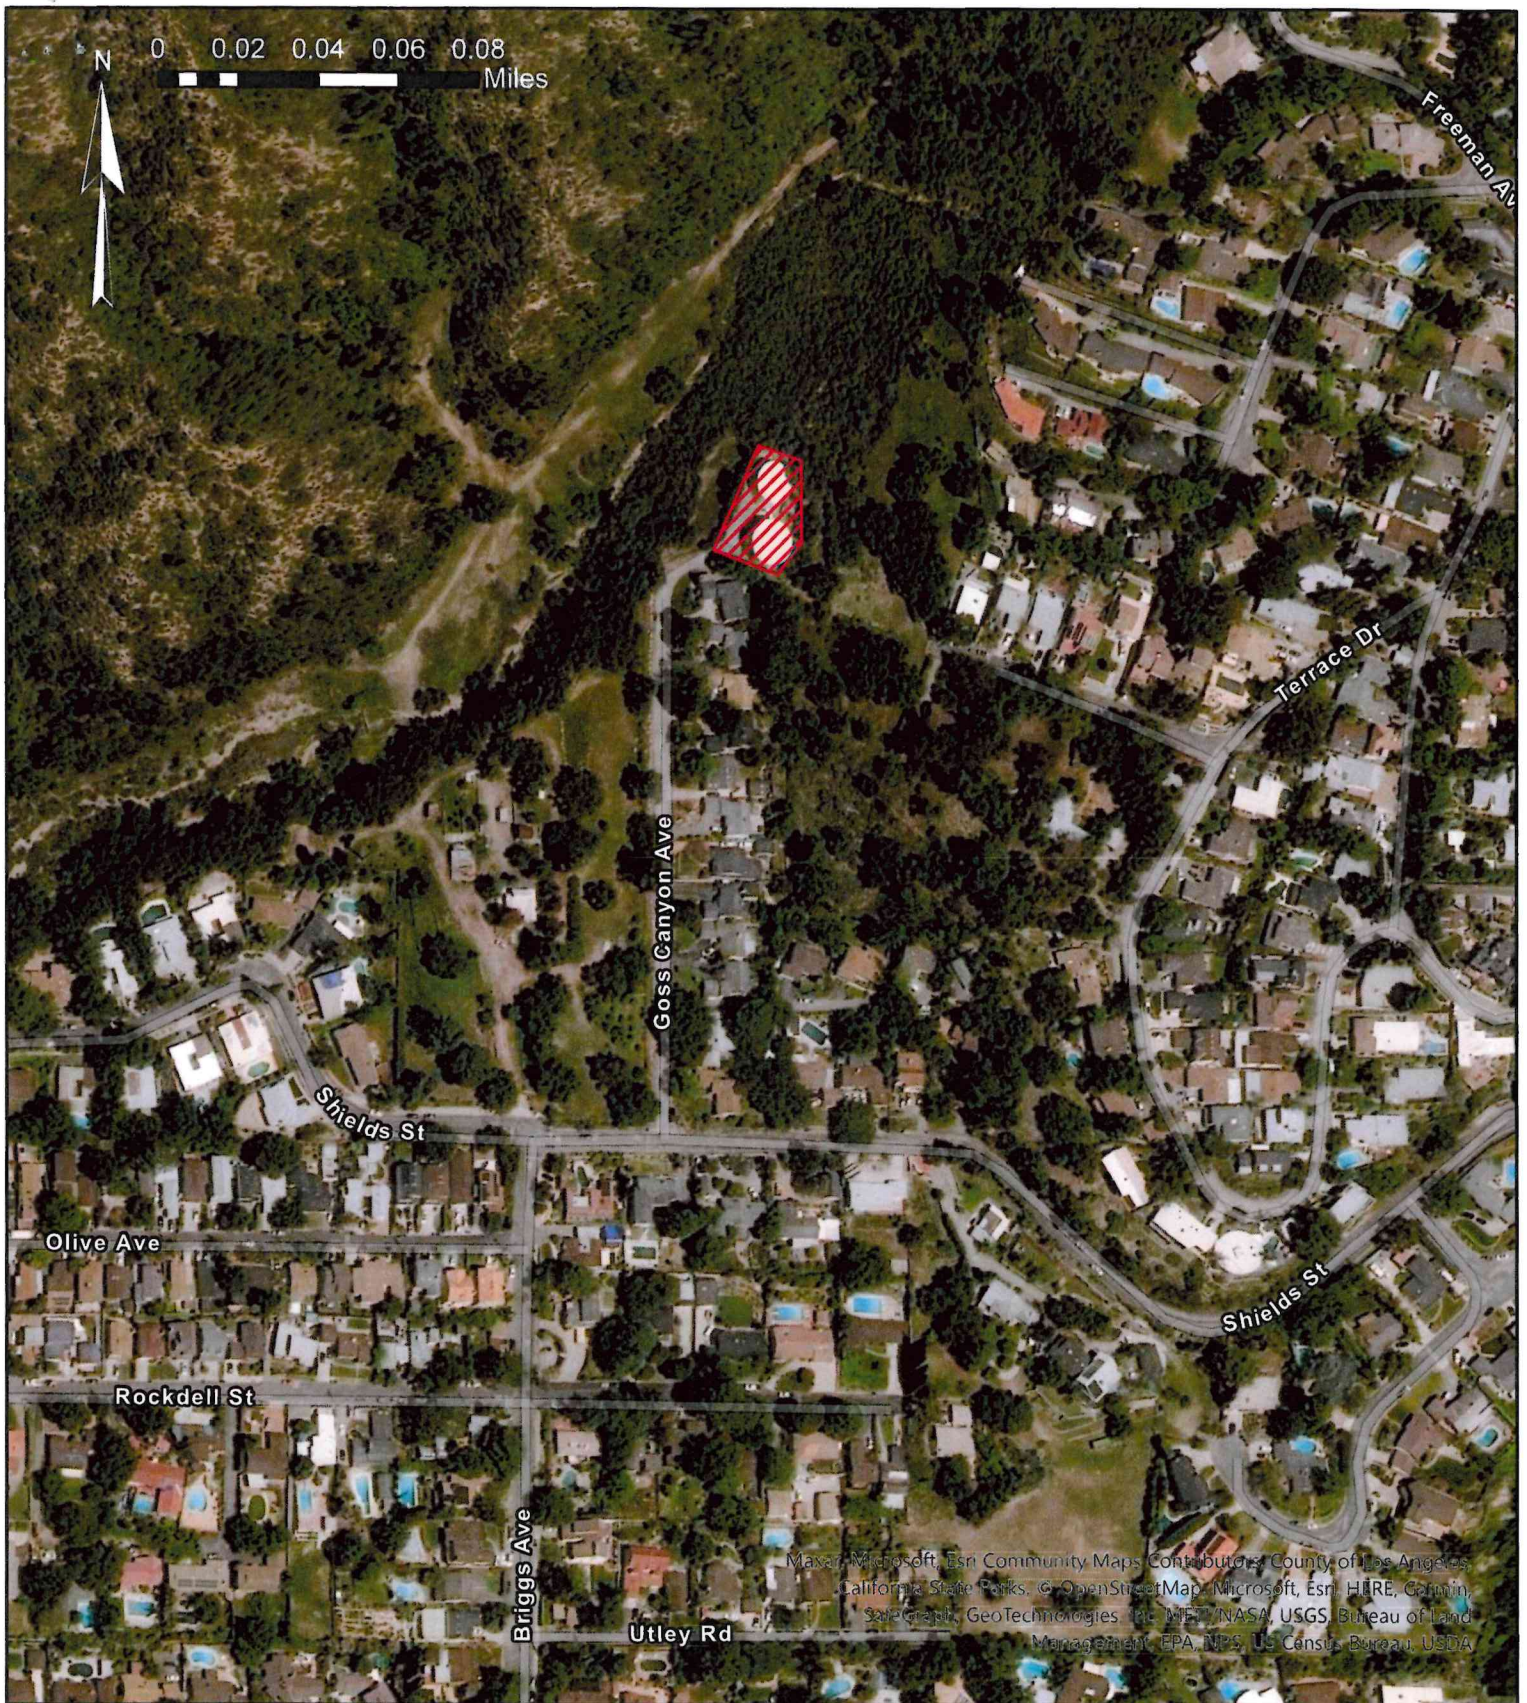

If you have any questions or comments concerning this project, please contact me by phone at (818) 236-4115 or email me at ckopelman@cvwd.com.

Very truly yours,

CRESCENTA VALLEY WATER DISTRICT

Christina Kopelman
Assistant Engineer
