Subject: Proposed Water and Wastewater Rate Increases

Dear Christy,

Like any government agency, the CVWD should dip into its reserves this year and postpone the water and sewer rates "adjustment" increases. They should adjust their annual budget by decreasing their expenses and the remaining gap should be filled using funds from District's reserve. I know fixed costs are expenses that do not change, such as employees' salaries, rentals and insurance and need to be funded. However, effective and efficient budget management is the cornerstone of a successful business operation.

Thank you and stay safe.

Subject: Meeting 4/14 re rate increases

This is unfair to raise rates without sending out notices and then have a virtual meeting no one can really attend. Many senior citizens can not afford an increase, please reconsider your actions in this time of pandemic and economic upheaval.

Thank you,

Cynthia Scroggins
