Christy Colby, Regulatory and Public Affairs Manager,

Please do not raise our water rates this year. I am concerned that cvwd is even considering raising our rates this year. As we are all quarantined at this time and many are out of work and struggling to pay their mortgages and bills. Many people in our community will not even know that your meeting is even going on. This will just add one more stress to our life's at this hard time. We need to come together as a community and you need to be apart of this coming together and find a way to cut your rates and help us all out during these (covid-19) times. Please vote NO on any rate increases at this stressful time. Thank you, Richard Lyans 3151 Brookhill st La Crescenta Ca. 91214

I will also be forwarding this to the newspaper as will...

At this time of crisis do not raise water rates, we are all fighting loss of funds, and with the absolute requirement to have water for safety this is certainly not the time for asking people to kick in with more funding. Because of the need to constantly cleanse water useage may actually go up and you will have more funds.

Hello,

We are residents of La Crescenta and found out about the proposed rate increase of 7%. We are writing to vehemently oppose this rate increase at this time. Many families and homeowners including our family have been hit severely in terms of our income due to the coronavirus outbreak. Please make our voice heard that we are not in favor of this rate increase. At the very least it should stay the same or at best be decreased for a period of time.

Please email me to let me know you received this comment. Thank you.

To whom it may concern,

We completely oppose any increase you want to do to water rates, or sewer rates.

Do you realize the issues that we are living??? Covid19!!!! If you heard about it.....
Losing jobs, not getting pay check increases....

Services companies never stop increasing!
We never get enough money to pay you!

Completely OPPOSED!!!!

Please do not raise our rates. People are suffering during this pandemic. It will take longer than July for people to recover to be able to pay the current rates let alone an increase!

Find other alternatives, such as budget cuts or renegotiate your purchase rates, if you need more money to supply water!

Thank you,

Joseph Oh

I am writing about the meeting which will take place on Tuesday April 14. I am voicing my opposition for the rate increase as the community is going through hardship these days with respect to the virus. So many people can barely make their ends meet, let alone deal with this! Please be considerate for the community and feel with the residents as you are part of the community too.

It is becoming too confusing for the residents of this community. During drought season you ask people to save water and when they do you complain there're no revenues. Your next step is to raise rates! If people use too much water you complain too. Make up your mind GUYS!!!

Dear CVWD Board Members,

We, as La Crescenta residents, would like to voice our opinion Against Water Rate Increase specially at this time when almost everyone is going through financial hardship.

We suggest CVWD Board check with county supervisor Kathryn Barger and or the state to secure funds from the county or state that may cover for Pennsylvania Ave., water line repair cost instead of increasing water rates.

Thanks,

Khatchig Mandjikian

Subject: April 14, 2020 Agenda Item - Action Item No. 2 - Proposition 218 Notice

CRESCENTA VALLEY
WATER DISTRICT

Attention Board of Directors:

Please know that I, for one, am not opposed to the Board taking necessary and prudent financial decisions to maintain and enhance our water supply. I'm no different than anyone who wishes I didn't have to spend more money for water. But wishing doesn't make it so. Being pennywise and pound foolish may allow the Water District to get by for only so long before a major problem develops requiring massive new capital. Please do your best to find ways to save costs in the budget, but I understand that many of the costs the Water District must fund, are to some degree, outside of the Water District's control. The need to offer competitive salaries, to procure ever more scarce water from outside sources and to replace infrastructure that has been in service beyond its service life are facts that can't be ignored.

Thank you for the opportunity to be heard.

John Fisanotti

CRESCENTA VALLEY
WATER DISTRICT

Hello Christy. Hope all is well.

From: Tom Webb

Re: My comments and requests for the Board Meeting April 14th

Public Comments: Non-Agenda items (not sure if this can be included under the Action Calendar):

- 1) Request that CVWD (the Director of Operations, Construction Supervisor and if appropriate the Director of Engineering, etc.) provide a detailed plan to increase the capture and redirection of rain water runoff to increase well water levels. This would include all water catch basins/canyons, canyon diversions or retention, and all other areas where rain water can be diverted or retained to increase well water levels.

Provide the Community Advisory Committee and Board with a date when this information will be provided.

Action Calendar Comments:

Item 1. Water and Waste Water Budgets

Re: Refinance of existing water bonds

Requesting the Finance Department provide the Board and the Community Advisory Committee an analysis for refinancing the existing water bonds. This should include any costs, time frames to execute, and the new annual debt service payment. Analysis should be provided by the next Finance Department/Board meeting.

Item 3. Long-Term Infrastructure Reliability and Funding Roadmap

Re: Issuance of new water bonds

Request the Finance Department provide the Board and Community Advisory Committee with detailed analysis of any costs and the amount of annual debt payment for the issuance of new water bonds. Analysis to include water bonds in the amounts of \$5, \$10 and \$20 million dollars.

Provide the Board and Community Advisory Committee with this analysis as soon as possible but no later than the next Finance Committee meeting or Board meeting.

If there are any questions, please let me know

Subject: PUBLIC COMMENT for 4/14/2020 CVWD Board Mtg (from M. Tyler)

CRESCENTA VALLEY
WATER DISTRICT

(Public Comment for 4/14/2020 CVWD Board Mtg.)

(Note to James Lee---I'd like to read my PUBLIC COMMENT myself. Thanks, Marilyn Tyler)

PUBLIC COMMENT: Congrats, Concerns and Criticism

1. CONGRATS on CVWD's first teleconference of a CVWD Board Meeting (held on 4/7/2020)---as a member of the public who participated remotely, I was impressed at how smoothly it went. Those of us who called in were not forgotten ("out of sight, out of mind"), instead, effort was made to include us in the discussion.
2. CONCERN: The Cost of Service Study, which was scheduled to be completed in late February/early March 2020, should be presented to the CVWD board as soon as possible since it pertains to topics currently under discussion (i.e., budget and rate increases). What is the status of the Cost of Service Study and when will it be presented to the CVWD Board?
3. CRITICISM: I challenge the accuracy of the following statement on page 1 of the draft Prop. 218 Notice: *"...a rate increase is necessary to cover current expenses."* To me, *"necessary"* implies that CVWD would not be able to meet its financial obligations if it did not impose a 7% rate increase. But this is not true.

As shown in Action Item 2 of the 4/14/2020 agenda packet ('FY2020-21 Water and Wastewater Budgets'), even if there is NO rate increase for water and wastewater in FY2020-21, CVWD would still be able to pay its bills---CVWD would not go bankrupt.

REQUEST: The entire Crescenta Valley community is suffering under the pandemic. We are tightening our belts--CVWD must tighten theirs. NO RATE INCREASE FOR THE UPCOMING FISCAL YEAR!

Sincerely,
Marilyn Tyler

Christy Colby,

I have learned on the Next-door website that a 7% increase in water rates is once again being suggested and while I received no notice from CVWD regarding this, I wish to express my disagreement with this fee increase at this time. We JUST had a fee increase, a substantial one at that!

And now in the midst of coronavirus 'safer at home' orders, it is not the time to again increase our rates. We already pay some of the highest rates around - I've compared to my coworkers in different area codes and some people are in disbelief. We are punished for living in this area code with our water rates!

Again, I do not support an increase in rates at this time.

Public Comment for Agenda Action Calendar Item 2.

We are writing this letter in opposition to the Proposition 218 notice proposing new water and wastewater increases. How can CVWD even think about proposing a rate increase during these troubled times. Many residents are out of work and struggling just to make ends meet and CVWD has the notion of raising rates, just pure stupidity. CVWD has consistently raised our water rates. We pay among the highest rates in the state, even LADWP is lower.

In addition, during this time public meetings are banned so no in person public comments are allowed. Do you expect us to use tele-conferencing or ZOOM for comments? And what about residents who have no computers or knowledge of computers? Sound's like a perfect time to slide a rate increases when no one is looking.

It is about time that CVWD Board of Directors listens to the residents. CVWD has plenty of money to pay salaries and overhead. Instead of looking to the residents for increases, start looking where you can cut unnecessary cost from your budget.

Sincerely,

Robert Manciero

CRESCENTA VALLEY
WATER DISTRICT

Dear CVWD board and staff,

We are writing this letter today in opposition to the Proposition 218 notice proposing new water and wastewater increases. Our rates are significantly higher than many areas and you have increased our rates every single year in addition to implementing tiers.

In reviewing the budgets you can manage without an increase and in this horrific time with many residents struggling to keep their homes and put food on the table it is more important than ever for you to take every measure possible to continue to provide service without an increase. I urge each board member to apply critical thinking and come up with solutions that do not put an additional burden on the residents.

I am also formally requesting you postpone any further action on this until public forums can be held. There are many seniors who do not have access to technology and therefore will not be able to attend an online meeting or even understand the use of teleconferencing, Zoom or other online meeting apps. Their voices must be heard. I think the timing of this might be intentional on your part and if it is not intentional then you need to think beyond your standard actions and revise your schedule to accommodate every citizen that will be impacted by this.

Please confirm receipt and inclusion.

Thank you,
Bron and Donna Ruf

I am disgusted to be AGAIN writing to CVWD about a proposed rate hike. I only wish I had kept track of the many letters I have sent and hearings I have attended on this same topic. Each time, I think "well, they won't do this again anytime soon!" and yet a year later, we are doing this same routine all over again.

I have lived in the same house since 1973. The number of kids at home has greatly fluctuated over the year. Our water conservation efforts have steadily grown to a ridiculous level. But my water bill is wildly irregular, shocking and often unaffordable. CVWD's unwillingness and/or unresponsiveness to public comment over the years has been deplorable. But once again, I am opposing the ludicrous rate hike.

This year's proposal is beyond belief. People are sick and dying in our community. People have lost their jobs. Students can not attend school. Shopping for the limited basic essentials has become difficult at best, possibly even dangerous to one's health. AND CVWD IS PROPOSING A RATE INCREASE????? Shame on you for your lack of understanding and empathy regarding a world pandemic. Shame on you for your continuing lack of concern for your own community. I am appalled.

I strongly oppose the proposed rate increase. Examine your infrastructure and find another solution like the rest of the world is doing right now.

Sherri Mudd
