

CRESCENTA VALLEY WATER DISTRICT

BOARD OF DIRECTORS - STAFF REPORT

To: Honorable President and Members of the Board of Directors June 11, 2019
From: Ron L. Mitchell, Secretary-Treasurer
Subject: **Proposition 218 Protest Letters**

DISCUSSION:

Staff has reviewed all Proposition 218 Protest Letters received to date and have determined that 94 letters meet all the requirements of Proposition 218 to be considered formal protests. The criteria are that they are signed by either the tenant or owner of the property, only one protest letter per address is allowed, the property address is shown on the letter, and the address is serviced by the District.

The District received by email an additional 279 protests, but they are not counted as they do not meet one or more of the criteria listed above. Also, a number of the 279 emails received have since re-submitted their protest in the correct fashion and are included in the 94 official letters mentioned above.

Prepared by:

Ron L. Mitchell
Secretary-Treasurer

I am opposed to
the increase.

Esteemed Board Members:

As a member of the La Crescenta community, I would like to express my frustration with the Water District processing automatic increases every year. I am writing to oppose this increase for the coming fiscal year.

High cost of living is becoming unaffordable. None of the other utilities are making automatic and unreasonable rate hikes. With all the upset caused during meter changes last summer and more people showing up to Board meetings with concerns, I hope the District realizes residents are becoming frustrated with the answer of "you probably have a leak" when they contact for explanations to high bills which include very high fixed fees attached to them.

A few years ago, as rates were increased, tier system went from 4 to 3 due to severe drought. This pushed many consumers into higher rate structure. With all the rain we have been having, please consider thinking of residents and giving us a break once-in-a-while. If you are attempting to build up a reserve, please make sure you review and eliminate waste and unnecessary expenses as well. For example, I have a problem every time I see your newsletter printed on expensive glossy paper! I would not mind a more economical method of communication.

Concerned Resident,

Armine Khachaturian

RE: Raise in Rates

I definitely oppose the increase of water rates. I've been a customer since 1963 and now I live on a fixed income. It's very difficult to keep up with the raise in rates of the utilities when on a fixed income.

I conserved water through the drought years and I still try to conserve when I can.

It seems like the more we conserve water and use less then you raise our rates.

Thank you for your consideration.

Subject: ^uProposed Adjustment in Water and Wastewater Rates

CRESCENTA VALLEY
WATER DISTRICT

I am definately against any rate increase. The "Service Charges" every two months shows that their charge supersedes the water usage at over \$100.⁰⁰. Here are a couple of examples: first

- 1) Water actually used - \$33.81
- 2) Total service charges - \$109.53 *
- 3) Total Bill for - 11-16-18 to 1-15-2019 \$143.34

second

- 1) water actually used - \$19.32
- 2) Total service charges - \$109.53 *
- 3) Total Bill for - 1-16-19 to 3-15-19 \$128.85

My property address: 2840 Altura Ave.
La Crescenta, Calif.
90214

The service charge fee has been constantly going up after "Cesspools" were alimited. My answer is **NO!** rate increases.

Sincerely
Lillian Modula

C.V. WATER DISTRICT BOARD

Subject: Proposed Rate Increase, Effective 7/1/19

Reference: Property Address: 2158 Crescent Avenue, Montrose, CA 91020

CV Account # 019303

Members of the Board:

After reviewing the notice of proposed water & wastewater rate increases, I wish to state the following.

I object adamantly to raising any and all fees charged by the District, including the increase known as the "Usage Rate" (from \$1.86 to \$1.95).

MY RATIONALE: Rounding numbers, a recent billing totaled \$122.00; Of that amount \$14.00 was for water. This is not an isolated case. That is totally absurd!

I do not have a problem with the proposed water rate increase.

Dear CVWD,

I am VERY OPPOSED to the
impending water increase!

It may seem like a "little" to you, but
I have not even had a raise of that
much since 2011. I drop my bill
off to save a stamp. And raising
the rates every year is infuriating,
esp when there is no choice
in the matter.

Crescenta Valley Water District

2700 Foothill Blvd.

La Crescenta, CA 91214

Dear Directors:

I strongly protest the proposed increase in CVWD water and wastewater rates.

The charges for CVWD services have increased steadily over the 20 years I and my family have resided in La Crescenta. Yet another set of increases will cause significant financial hardship for us and other seniors living on fixed incomes, as well as other residents of limited means.

Please find other ways of addressing your budgetary needs.

Yours truly,

Distressing CVWD News

I would like to expand on the article "CVWD Proposes Raising Rates" (News, May 9).

This will be the 16th consecutive year the District has raised water rates. The increases have averaged more than 6% every year. We have seen our meter charges increase 161% since 2009. We have also seen our wastewater rates increase in a similar fashion. In 2016-17, the District introduced a new charge called "usage rate," which is now part of the wastewater charges.

The May 9 article forgot to mention the proposed 3.8% usage rate increase in addition to the 4% wastewater service charge, 7% water usage rate and the 7% water meter charge. This equates to a 22% increase over last year.

calculates the rate increase on the use of 17 units of water. This equates to 10 units in tier 1 and seven units in tier 2 for the calculation. I believe this isn't a fair representation of the real cost many users will pay.

Although the District publishes a \$10.65 bi-monthly increase, if one looks at the different costs between tiers it tells quite a different story. Between tier 1 and tier 2, the user pays 57% more for the same water. In tier 3, the user pays 138% more for the same water.

In fairness to consumers thinking they will see an increase of \$10.65 bi-monthly as published, the District should provide a simple template where customers can fill in their consumption and see the real increase they can expect.

Finally, I would like to see the District and [its] board develop specific cost-cutting goals that can be measurable. Without measurable goals we will see our rates continue to rise year after year.

Crescent Valley Water District

My name is Roy Pauly and I would like to register my disapproval to any hike in water rates and waste water disposal. We as a community do our best to conserve water. I feel it is your duty also to save the water that runs down our streets when it rains.

Los Angeles had settling fields in areas along the L.A. river. These fields were taken over by industries that destroys the idea of water conservation. We don't have settling fields but we do have canyons to

to engineer settling areas. We can't ignore saving water from every opportunity. Buying from outside sources will continue to raise prices.

Glendale City Council has measure "W" that they will share 50% with regional areas around Glendale for water reclamation. Hopefully it could help our water saving engineering problems.

Thank you for the opportunity to express my thoughts.

Sincerely
Roy Pauly

RE: Proposed Rate Increase effective 7/1/19
Public Hearing 6/12/18

Gentle People:

Here we go again, another proposed rate increase proposal. Only this time, it appears to have been done by a professional.

Private business can't operate the way the water district does and just pass along the increases. Private business lives within their budget guidelines.

Please explain to me and the public the following:

Why is there a 'usage charge'?

What are the cost cutting goals?

Explain, who pays for the medical and retirement programs?

Thank you,

Chester P. Zalewski

La Crescenta California 91214

Dear Board of Directors:

I oppose the proposed rate increase. Increases have already occurred due to drought conditions. The three-tier plan has increased water bills, especially to homeowners who have larger properties.

As a retired person on a fixed income, I cannot afford to change my landscape to drought-tolerant plants, yet I want my yard and home's exterior to be well maintained for the sake of the neighborhood.

There are only 2 occupants to a very small home (1200 square feet), and I had low-flow sprinklers installed during the beginning of the drought conditions and still my water bill averages \$225.00 monthly.

If there are incentive programs to change to drought-tolerant landscaping, you should let your customers know, but I, for one, oppose a rate increase at this time.

Sincerely,

A handwritten signature in cursive script that reads "Cecile Keeton". The signature is written in dark ink and extends horizontally across the page.

To CVWD Board of Directors:

I am a La Crescenta property owner receiving services from CVWD. I am writing to express my opposition to the proposed rate changes. CVWD has already increased rates several times in the past few years that I have been a customer. I ask that the Board of Directors please vote against raising the rates again. I trust the organization can find other ways of dealing with the current issues other than increasing costs such as inefficient use of labor and other resources. Thank you for taking my request into consideration.

Sincerely,

Roobina Kahdian

Attn: CVWD District and Board of Directors

Subject: Letter of Protest

Ref: Crescenta Valley Water District 2019/2020 Proposed Rate Increase

Dear District and Board Members,

Regarding the 2019/2020 Proposed Water Rate and Wastewater Rate increase, I would like to submit my written protest to the proposed rate increases.

With the proposed water rate increase it will be the 16th connective year our water rates have increased. The average annual increase over the 16 years has been more than 6% per year. Additionally, we have seen the water meter charges increase 122% since 2009. We have seen similar increases on our wastewater rates as well as the newest "Usage Rate" tied to water used. The new norm seems to be the District will increase our rates on a yearly basis to meet their wants.

Additionally, we continue to see the District's rate increase breakdown based on 17 units of water. The actual cost to customers can be substantially higher if they are using more than 17 units. I have asked the District to provide several different scenarios or a template to provide customers transparency of the "realistic" rate increase at different usage levels. I would like to direct the District and Board to the Rate Study dated July 20, 2016 page 51 figure 6.1 which showed this transparency of rates at different tiers. The District has refused this request for better transparency.

Regarding the consumption of water, we have seen the District impose tier rate pricing. Table 1 clearly illustrates the rate increases are clearly targeting higher water users. It is my understanding that the price of water charged should be proportional to the cost of service for that specific tier. I find it puzzling that the cost to deliver water in tier 3 is **138%** more for the cost of water in Tier 1. I would like to request the data that correlates the Districts tiered prices with the actual cost in those tiered levels. Table 1 below illustrates the huge inequities in what customers are charged in the different rate tiers between 2010 and the rate increase for 2019/2020 .

Table 1
Rate Increases per Tier 2010 - FY 2019/2020

* Totals include proposed rate increase

Numbers are rounded for clarity

Data reflects rates in 2010 and 2020 and does not take into consideration the Districts changing of tiers and units per tier over timeframe.

Table 2 illustrates the year over year increases in our meter charges. It is troubling to see that starting in 2007 the increases are much larger than earlier years. This chart clearly illustrates a trend in the wrong direction.

Table 2

Meter Charges (Bi Monthly)

In my opinion the District has not demonstrated any measurable cost cutting efforts to control these year over year increases. I have asked the District and our Board members in writing and at public meeting's to include quantifiable goals in the budgets to identify and focus on controlling the high cost areas. I believe that measurable goals should be part of any budget and one of the metrics used in performance reviews for management. I would also think the Board who is our elected "watchdogs" would insist on measurable objectives on behalf of the customers whom they serve.

In Conclusion, I would like to ask the District and our elected Board of Directors to respond to my questions.

- Can the District review the Parcel Allocation Development Methodology Page 79 of the CVWD Cost of Service Study dated July 20, 2016 to investigate a possible Outdoor Variance for large lot owners? I would like to request that the District use the same Block definitions for large lots as used in the Cost of Service Study. Whereas the study designates 10,001 square feet as a large lot the CVWD is using 21,780 square feet.
- Can the district provide the rationale that correlates the price with the actual cost of providing water at each tiered level?
- Can the District's budget include quantifiable and measurable goals that identify and focus to control high item expenses? Performance to these goals should be included in the performance reviews of management.
- With the continued influx of multi family housing within the District and new customers generating more revenue can this offset some of the proposed rate increases?

I trust this protest letter will be made public and part of the Protest Letters for the agenda package at the June 11, 2019 Public Hearing Meeting.

Respectfully,
Jonas Williams

Subject: CVWD Proposed Water and Sewer Rate Increases - Letter of Concern (3 pages)

RECEIVED
JUN - 7 2019
CRESCENTA VALLEY
WATER DISTRICT

Although CVWD and I have not seen eye to eye on every issue, I have valued my interactions with board members and staff, especially board member Judy Tejeda (whom I met when CVWD attempted to allow the construction of a 70-ft tall ATT cell tower only 50 feet from my property boundary), office staff, and district engineer David Gould and his team whom I met on various renovation projects affecting my section of Brookhill Street. Everyone I have met cares about their work and about performing it to a high standard. Everyone I have met has patiently answered questions in a professional yet friendly way. Your excellent website is an example of the effort you make to keep the community informed. Your April flyer is also an informative overview of the challenges and responsibilities faced by CVWD. However the flyer falls short with respect to the proposed water and sewer rate increases, as described below.

I want to share my concerns about the proposed water and sewer rate increases, which I first found out about via the April flyer I received in the mail. My first thoughts were, Why are the rates going up? Didn't they just go up last year? How can I verify that the new rates are reasonable? I familiarized myself with Proposition 218 and then noticed your flyer mentioned a cost of service study. I assumed that the cost of service study would answer my questions.

But upon further research I discovered the CVWD flyer was perhaps intentionally misleading. It states, "As a public agency, CVWD cannot earn a profit from the services it provides and must charge no more than the costs associated with providing services to its customers. The District conducts a 'cost-of-service' study every five years, and CVWD commissioned a nationally leading consultant for a detailed and independent analysis."

A reasonable person (I use myself) would assume that the above statements mean:

CVWD Statement #1: "CVWD...must charge no more than the costs associated with providing services to its customers."

Inference #1: It is impossible for CVWD to charge rates higher than the costs of service. (So rest assured, the rates are fair.)

Why this inference is suggested but FALSE: as I understand it, water districts have the power to charge whatever rates they want to. The requirement to correspond to cost of service only comes into play when the rates are challenged by irate consumers in court---if the water district can show via administrative record that the rates correspond to cost of service and the other requirements of Proposition 218, the water district wins. If they can't, they lose. For example, CTA v. City of San Juan Capistrano.

CVWD Statement #2: "The district conducts a 'cost-of-service' study every five years, and CVWD commissioned a nationally leading consultant for a detailed and independent analysis."

Inference #2: CVWD is currently abiding by the recommendations given in the cost of service study. (So rest assured, a third party---Raftelis Consultants, Inc.---is looking over CVWD's shoulders and keeping them honest.)

Why this inference is suggested but FALSE: Raftelis delivered the cost of service final report on July 20, 2016, with recommendations for water and sewer rates for July 2016, July 2017, July 2018, July 2019 and July 2020. CVWD followed the proposed water and sewer rates for July 2016 (FY 2017) only. CVWD chose to go their own way in July 2017, exceeding the rates proposed by Raftelis, and changing an underlying assumption in the Raftelis report (CVWD increased the revenue recovery rate for bi-monthly service charges from 25% of revenue to 26-27% or above---I couldn't discover the exact percentage.) This information, that CVWD has chosen to diverge from the cost of service study, is not noted on the CVWD flyer or website. I only learned about it by chance in conversation.

Conclusion: When I read what I later discover to be perhaps intentionally misleading statements, about such an important issue as the nexus between cost of service and rates, I ask myself "Why did CVWD write these misleading statements? Why did they rave about the cost of service study and then neglect to mention that they were not following its recommendations and were changing one of its assumptions?" My distrust increases, and I am led to oppose the proposed water and sewage fee increases.

Suggestions for the future:

1. Adopt a cost of service study in its entirety, i.e., follow its recommendations. The cost of service study can be both CVWD's shield and bridge of communication to the community. The study provides the necessary detail to educate the community as to how rates are arrived at, and provides a common basis for questions to be asked if CVWD exceeds the recommended rates in a given year. CVWD must be transparent in informing the community when it deviates from the cost of service study, and provide reasons for the deviation. Also, the fact that the study is performed by an independent third party can inspire confidence in the community that the cost of service study and thus the resulting rate structure is valid and fair.
2. Proposition 218 requires that a reason be given for each increased fee. There is disagreement about what constitutes a "reason." But I agree with "Proposition 218 - Local Agency Guidelines for Compliance 2007 Update" by the Association of California Water Agencies, which states on page 20: "For instance, the reason for a rate increase could include an increase in the cost of water from the wholesaler, increased treatment costs due to stricter quality standards, increased personnel costs, or general increases in the cost of operating a water system. The explanation of the reasons for the increase in the notice will necessarily be less detailed, but the agency nevertheless must have detailed data to support the amount of the increase, including actual cost data and water sales projections, prior to the hearing on the increase. Data that was not before the governing body at the time the fee or charge was adopted or increased cannot be used later to defend the amount of the increase against a challenge that the fee or charge exceeds the reasonable cost of providing the service. (Beaumont Investors v. Beaumont-Cherry Valley Water District (1985) 165 Cal. App.3d 227.)"

Is CVWD abiding by this ACWA guideline, i.e.: "...The explanation of the reasons for the increase in the notice will necessarily be less detailed, but the agency nevertheless must have detailed data to support the amount of the increase, including actual cost data and water sales projections, prior to the

hearing on the increase." Is this information available for viewing by the public prior to the public hearing on June 11?

3. I asked someone associated with CVWD if a rate increase was planned for next year and they said they didn't know. If CVWD continues to increase rates year after year with no warning except on the April prior, I worry that your relationship with the community will continue to deteriorate until you have a yellow vest protest on your doorstep (or the nuclear option---an initiative). The advantage of adopting a cost of service study in it's entirety is that it gives the community visibility over 5 years---we can see what might be coming so we're not taken by unpleasant surprise.

4. Another problem with the April flyer is that qualitative explanations for the proposed rate increases such as "Changing rates would proactively maintain critical parts of the water system" and "the costs involved in providing this essential service (operations and customer service) are increasing, and rate changes are needed to maintain financial stability" don't answer the question "But why is the meter charge for 3/4 inch going from \$50.56 to \$54.10 and not \$42.30---where did that \$54.10 come from?" Broad, general, qualitative statements as answers to specific questions tend to increase distrust rather than reduce it.

The relationship between CVWD and the community is changing: it can devolve into adversarial bunker mentalities where both the community and CVWD feel besieged, or it can evolve into a relationship based on transparency and collaboration. I hope its not too late for the latter.

PROPOSITION 218 PROTEST FORM

By signing the form below, I protest the proposed (water/wastewater) rate increases and affirm under penalty of law that I am the owner, authorized representative of the owner, or tenant of the below parcel.
