

Questions during the April 4, 2023, 12:00 p.m. Townhall Meeting

1. The Charge based on usage would seem more fair than a charge based on diameter. That way those who use more (water) would pay more.
2. Is there any impact on the bi-monthly water bill, or just the property tax roll?
3. Have you applied or looked at applying to for Federal funds the recent infrastructure Bill has funds available. There was 50 billion available for water infrastructure. So, have you looked at that?
4. The charge should be based on water usage to be fair.
5. Will you include a specific expiration date on the property tax assessment? (How long with property charge last)
